2011 LJCHOA Board Members (update!)

At its May meeting, the Board appointed and welcomed aboard two new members who answered the urgent "call" contained in the last newsletter. Our association's full Board of Directors has the following members:

- Chairman = Glenn Grayson**
- Secretary = Caesar 'Sid' Casciola**
- Treasurer = Carol Oullette
- Director (new!) = Evelyn Akiva
- Director (new!) = Tracy Roffman

(** These two also serve as LJCHOA ARC members)

Now (...possibly for the first time in its history?), the women have outnumbered the men on the Board. Thanks also go out to Jean Foss and Gary Carpenter (both past Board members) who also volunteered to fill out the Board if not enough "new blood" had been found.

Boynton Beach Entryway Spruced Up

The front entrance pony walls have been repaired and repainted. Additionally, new plants have been added and a few others changed or removed. Please take a minute to view them at your convenience. Our goal is to make the La Jolla Classics entrances a pleasing sight to see.

New Trash Cans for Desert Shores

By now every resident of La Jolla Classics should have received a letter from Republic Services advising them Republic will begin a once per week (every Friday) regular trash and recycle collection on August 12. Delivery of the new trash and recycle carts will begin on Monday, August 8th. However, **DO NOT USE EITHER THE NEW TRASH OR RECYCLE CARTS THAT TUESDAY.**

Please note that Tuesday, August 9th will be the last recycle pick up using the old red, white, and blue crates. Even if you don't have anything to recycle please leave the crates out on the 9th so Republic Services can collect them. If you happen to miss putting out the old crates on the 9th just put them into the new recycle

carts on Friday. Or, if you want to use the crates for storage you are welcome to keep them according to Republic Services.

We look forward to participating in Republic's new pilot program. The carts with lids will eliminate the wind blown trash we've all experienced. Also, birds, rodents and other pests will no longer be able to get at the trash bags. In the past they've punctured holes and scattered the trash about.

The Street isn't Your Trashcan !(part 2)

If you have mass quantities of landscaping or building materials delivered to your home, it is not acceptable for them to be placed, stored or staged on the street. Rather, these materials should be deposited on your own driveway. The only possible exception to this is when pallet-fulls of clay roof tiles are delivered, since the weight might crack or otherwise damage your driveway concrete. Please direct your contractors accordingly.

Common Sense = Common Courtesy

The Board has received several verbal complaints from residents finding dog excrement on their lawns and/or sidewalks throughout La Jolla Classics. Every time you walk your dog please carry a plastic bag(s) and pick up after your animal. Then place the bag into your own trash container. Notice is hereby given to all residents that if you are observed not picking up after your dog you will be called to a hearing to explain your inaction. Fines could be levied for failure to comply with this rule.

Did You Know?

While the name of our gated community is La Jolla Classics, the official name of our HOA is the La Jolla Classic Homeowners Association (LJCHOA for short). Note the very minor difference - - "Classic" is singular in the HOA name. In all likelihood, this was an unintended typographical error that was committed by our neighborhood's original builder, McKellar Development, when drawing up the association's legal documents.
